

KAAN ÇINAR

JUNIOR JAVA DEVELOPER

ABOUT ME

Junior Java Developer with hands-on experience in backend development using Core Java and Spring Boot. Skilled in Object-Oriented Programming (OOP), RESTful API design, relational databases (SQL), and version control (Git). Strong analytical thinking and problem-solving skills, supported by a computer engineering background. Focused on writing clean, maintainable code and building reliable backend services.

EXPERIENCES

Software QA Engineer, July 2021 - November 2021

Intertech , Istanbul

Responsibilities

Manual Testing, Test Automation, Regression test, Test Planning, UI Test, API Testing, Reporting (Bugs ,Fails ,Errors), Functional Test

Used Technologies

C# , Selenium , Jira , Specflow, NUnit, Jenkins, Agile , MSSQL, Git, RESTAPI

PROJECTS

HotelBookApp-SpringBoot-SSMS-HTML5-CSS-JS-MAVEN

Responsibilities

- Designed and developed a full-stack hotel booking web application using Java and Spring Boot.
- Built RESTful APIs and backend controllers to manage room listings, availability, user reservations, and booking statuses.
- Designed relational database schemas, tables, and constraints using Microsoft SQL Server Management Studio (SSMS).
- Developed interactive and responsive frontend user interfaces using HTML5, CSS3, and JavaScript for seamless booking workflows.
- Managed project dependencies, plugins, and build life cycles using Apache Maven.
- Wrote automated unit and integration tests using TestNG to validate business logic and handle edge cases (e.g., double bookings, invalid date ranges).

Used Technologies

- Backend & Frameworks: Java, Spring Boot, Maven
- Database & Management: Microsoft SQL Server (SSMS), SQL
- Frontend: HTML5, CSS3, JavaScript
- Architecture & Concepts: RESTful APIs, MVC Pattern, Object-Oriented Programming (OOP), CRUD Operations
- Testing & Tools: TestNG, Git

[Project - Overview / Documentation](#)

JAVA-RESTAPI-CUCUMBER-BOOKSTORE-TEST

Responsibilities

- Designed and built an automated BDD (Behavior-Driven Development) test framework using Java and Cucumber to validate Bookstore REST API endpoints.
- Wrote clean, readable Gherkin feature files (Given-When-Then) covering core API workflows, CRUD operations, and response validation.
- Automated API requests (GET, POST, PUT, DELETE) and validated response status codes, JSON payload structures, and headers using RestAssured / Java HTTP libraries.
- Implemented step definitions and test utility classes following Object-Oriented principles to maintain reusable and scalable test code.

Used Technologies

- Language & Core: Java, OOP
 - Testing & BDD: Cucumber, Gherkin, RestAssured / API Automation, TestNG / JUnit
 - API & Data Formats: RESTful APIs, JSON
 - Build & Tools: Apache Maven, Git

EDUCATION

2016 - 2021

INONU UNIVERSITY

Bachelor Degree ,

Computer Engineering ,

GPA : 3.20

2026 - Present

HACETTEPE UNIVERSITY

MSC Degree , Computer Engineering

SKILLS

- Languages & Frameworks: Java (Core Java), Spring Boot
- Backend Development: RESTful API Design, Backend Service Architecture
- Databases: Relational Databases, SQL
- Core Concepts: Object-Oriented Programming (OOP), Clean Code Principles, Data Structures
- Version Control: Git
- Soft Skills: Problem-Solving, Analytical Thinking

LANGUAGES

English (Professional)

Turkish

CERTIFICATION

AKADEMIA WINCENTEGO , POLAND ,

JUNE , 2023

[Language Certification - English](#)
